## PROJECTS

---

### Personal Portfolio ([Visit here](#))

- Created my visually stunning portfolio using a combination of HTML5, CSS3, Bootstrap5, JavaScript, Typed.js for animated typing effects.
- Implemented functionality to open one terminal web page in another browser and utilized LocalStorage API to store the visitor's preferred theme for later visits.
- Applied AOS animation v3.0.0 for smooth transitions and interactive tilting components using vanilla-tilt.js.

### Student Result Management System ([Visit here](#))

- Built one comprehensive software solution to streamline the management of student academic results.
- Executed HTML5, CSS3, Bootstrap5, JavaScript, jQuery, PHP8, and MySQL8 to create a robust project capable of handling and organizing academic data for more than 10,000 students within an educational institution.
- Put into effect features for real-time data management and analysis, ensuring efficient organization and accessibility of more than one academic records.

### PlayNet ([Try it here](#))

- Developed a YouTube clone web application using HTML5, CSS3, JavaScript, JSX (version 4.2), ReactJS (version 18.0), and React Router DOM to offer users an immersive video browsing experience.
- Integrated YouTube API v3 seamlessly into the application to provide users with a smooth video browsing experience and enhanced content discovery capabilities.
- Designed to emulate the fundamental features of YouTube, the application allows users to search for videos with rate-limited fetching of the latest 20 videos, ensuring familiarity and efficient browsing akin to the original platform.
